RE: Five Year Surety Review – Cotton Thomas Quarry, M/003/024

Dear Mr. Jensen:

The maps necessary for the five-year review surety review for the Cotton Thomas Quarry, (M/003/024) are enclosed with this letter. There are six maps that detail both the proposed bonded area for the next five years of operation as well as the areas we are seeking to be released. There is a bond release form attached to the corresponding maps.

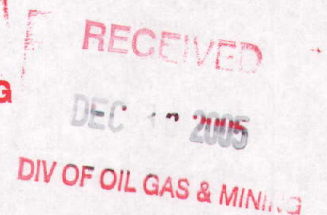

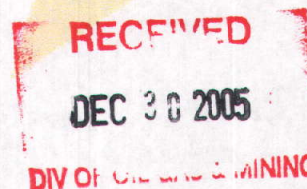

The legend included with the maps identifies changes that we request to our current mining plan. There are 5.77 acres that we have reclaimed and request to be released. We request to increase our active mining to 157.19 acres for the quarries, 24.71 acres as existing roads, 21.6 acres of new roads, total 203.5 acres.

We are proposing changes to the current roads as well as four new roads. We request to realign a section of road (A), we will reclaim the old road as soon as we complete the realigned portion of the road. We have widened section (E), which is included in this permit request, this will increase this road by .60 acres. We are seeking to add a new road, (C), to the north of the property, which totals 21 acres. We plan on constructing a previously approve road from Windridge rubble northwest to an old existing road (F), .78 acres. We also request two new roads, (B) and (D), to new areas that we request the road acreage be exchanged for area included in the enlarged permit area where it covers sections of old road, (the area is approximately equal). Theses areas are indicated on the maps.

We are submitting these maps for your review. Please let us know if you have any questions. You may contact me at (801) 262-4300.

Sincerely,

Lon A. Thomas
